AGENDA FOR THE REGULAR MEETING OF THE BOARD OF DIRECTORS OF THE TEMESCAL VALLEY WATER DISTRICT AUGUST 23, 2016, 8:30 A.M. AT THE DISTRICT'S ADMINISTRATIVE OFFICE 22646 TEMESCAL CANYON ROAD, TEMESCAL VALLEY, CALIFORNIA 92883

The following is a summary of the rules of order governing meetings of the Temescal Valley Water District Board of Directors:

# AGENDA ITEMS

In case of an emergency, items may be added to the Agenda by a majority vote of the Board of Directors. An emergency is defined as a work stoppage; a crippling disaster; or other activity, which severely imperils public health, safety or both. Also, items, which arise after the posting of Agenda, may be added by a two-thirds vote of the Board of Directors.

# **PUBLIC COMMENT**

Persons wishing to address a matter not on the Agenda may be heard at this time; however, no action will be taken until placed on a future agenda in accordance with Board policy.

# **NOTICE TO PUBLIC**

All matters listed under the Consent Calendar will be voted upon by one motion. There will be no separate discussion of these items, unless a Board Member or member of the public requests that a particular item(s) be removed from the Consent Calendar, in which case, they will be considered separately under New Business.

> IF ANYONE WISHES TO SPEAK WITH THE BOARD ABOUT ANY CONSENT CALENDAR MATTER(S), PLEASE STATE YOUR NAME, ADDRESS, AND APPROPRIATE ITEM NUMBER(S).

# **AFFIDAVIT OF POSTING**

I, Allison Harnden, Office Manager of the Temescal Valley Water District, hereby certify that I caused the posting of the Agenda at the District office at 22646 Temescal Canyon Road, Temescal Valley, California 92883 prior to August 20, 2016.

Allison Harnden, Office Manager

Board of Directors Temescal Valley Water District

RE: General Manager's Report

Dear Board:

The following is a brief status report on a number of issues that I have been involved in since the last meeting.

- Working on non-potable water supply improvements
  - New Sump Well Pipeline and Well improvements In and operational
  - Perk Pond Reuse Piping In and operational
  - New Foster NP Well In Service
- Working on Conservation opportunities and RW conversion locations Retreat
  - Working with Land Developers on water and sewer fees for multiple infill projects.
    - Deleo adjacent to Tom's Farms No Activity
    - o Forest Boundary Plan Checking design plans Signed
    - Retreat Infill Kiley Court
    - o Temescal Canyon Road at Campbell Ranch Road No Activity
    - Kiley Family Trust Property Tract Map Stage
- In Construction of TWC Retrofits
  - o Dawson Canyon RW Tank Construction in operation Completion July 1<sup>st</sup>
  - o Park Canyon Drive RW line Design
- Terramor CFD
- Terramor Review:
  - o New sewer lift station Signed
  - Percolation area
  - o RW and Potable Tank Siting
  - Terramor Onsite Water, Sewer and RW improvements
    - o 1320 Water line
    - o 1509 Water line
    - Back Bone Gravity Sewer
    - Potable Water Booster Upgrade
    - o RW Water
- Sycamore Creek:
  - o TM 36317 Water Sewer and RW improvement plans
  - o TM 36317 Potable Booster

# **Fact Sheet**

# State Water Resources Control Board Posts 36-Month Urban Water Supply Stress Test Submissions

On May 18, the State Water Resources Control Board adopted a statewide water conservation approach that allows urban water suppliers to replace their prior state-assigned percentage target reduction with a localized "stress test" approach based on a showing of whether they have at least a three-year water supply under extended drought conditions.

The revised emergency regulation followed significantly improved water supply conditions in most of the state and recognition that urban water suppliers are now better positioned to respond to drought impacts following their experiences conserving upwards of 24 percent of their water use over the past 13 months than they were in mid-2015.

The revised regulation requires individual urban water suppliers to self-certify the level of available water supplies they have assuming three additional dry years. Wholesale water agencies were also required to include documentation about how regional supplies would fare under three additional dry years. Both urban water suppliers and wholesale suppliers are required to report the underlying basis for their assertions, and urban water suppliers are required to continue reporting their conservation levels. The State Water Board has not independently verified the information, but reserves the ability to reject certifications later found to be erroneous.

# **Several Benefits to Three Year "Stress Test" Effort**

The purpose of the three-year "stress test" was to acknowledge both the level of water supplies available to different areas, through improved hydrology and/or significant investments in new supplies, e.g., recycled water, groundwater banking, local surface and groundwater storage, desalination, stormwater capture, or other methods. By choosing a three-year conservative planning horizon, the state could step back this year from its unprecedented specific target setting.

Water suppliers that would experience shortage conditions in 2019 under the three-dry-years assumptions must meet a state-imposed conservation standard equal to the shortage level. For example, a supplier with a 12 percent shortage will now have a 12 percent conservation standard. Water suppliers whose submittals show no shortage conditions are limited to their 2013 water use and are encouraged to conserve more.

Submitting a self-certification was optional. Water suppliers that did not submit selfcertifications will retain their conservation standard from March 2016, which 32 decided to accept. Others, even if they meet the "stress test," are expected to and have retained either a percentage or other requirement-based conservation program. The State Water Board will continue to monitor and require reporting of water use and conservation results monthly throughout the year.

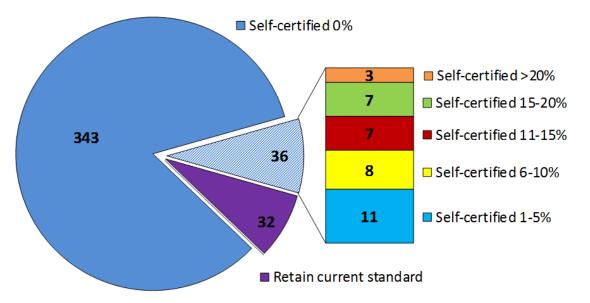

All state-imposed conservation standards will be in place through January 2017, at which point the State Water Board will evaluate water supply conditions and the level of conservation savings and determine whether addition emergency conservation regulations are necessary. Executive Order B-37-16 directs the State Water Board to be prepared to reestablish mandatory conservation levels if conditions warrant.

## Hundreds of Submitted, Individual Self Certified Tests Reviewed

State Water Board staff reviewed the self-certification submittals to ensure they were complete, well-documented, and clear. Since the June 22 submission deadline, staff has worked to follow up with suppliers whose self-certifications were inadequate.

Nearly all of the water suppliers that were contacted about an inadequate self-certification furnished additional information. However, nine suppliers' submissions are still inadequate, and these suppliers were issued Informational Orders on August 16, 2016. Those suppliers will have to provide the identified additional information to the State Water Board. Suppliers that do not provide complete self-certifications may have them rejected, and be returned to their March 2016 conservation standard. If a supplier does not respond to an Information Order within 30 days, the supplier may also face monetary penalties.

The majority of suppliers projected sufficient potable water supply under three additional years of drought and passed the "stress test", meaning zero percent state-mandated conservation standard compared to 2013. Thirty-six suppliers identified new conservation standards based on supply shortfall from "stress test" results. Thirty-two urban water suppliers did not submit "stress test" and retain March 2016 conservation standard. The figure below shows the results of the self-certifications and status of conservation standards.

\*The above results include one supplier new to reporting that also submitted "stress test" information, bringing the total number of urban water suppliers to 411.

More than 4.2 million Californians are served by the 68 urban water suppliers that will have a state-mandated conservation standard, either based on the "stress test" results or because suppliers opted to keep their existing conservation standard.

Despite the conservation standard of zero percent, the majority of water suppliers reported <u>water savings in June 2016</u> compared to June 2013. In the Bay Area, Contra Costa Water District, Dublin San Ramon Services District, and Alameda County Water District are among 17 water suppliers that passed their "stress test" and reported water conservation above 25 percent in June 2016. Additionally, several agencies opted to maintain voluntary conservation standards above the requirements based on the "stress test" results.

The regulation keeps in place the monthly reporting requirements and specific prohibitions against certain water uses. Those prohibitions include watering down a sidewalk with a hose instead of using a broom or a brush, or overwatering a landscape to where water is running off the lawn, over a sidewalk and into the gutter. Prohibitions directed to the hospitality industry also remain in place. Prohibitions against homeowners associations taking action against homeowners during a declared drought remain as well. As directed by Governor Brown's Executive Order B-37-16, the Board will separately take action to make some of these requirements and prohibitions permanent.

The adopted regulation is the result of review of many meetings, written and oral comments from a public workshop on <u>April 20</u> to receive input on conservation needs through the summer and fall, and lessons learned since the Water Board first adopted drought emergency water conservation regulations.

## **Governor and Board Actions Achieved Historic Conservation Statewide**

In his April 1, 2015 <u>Executive Order</u>, Governor Brown mandated a 25 percent water use reduction by users of urban water supplies across California.

In May 2015, the State Water Board adopted an emergency regulation requiring a cumulative 25 percent reduction in overall potable urban water use over the following 9 months. The <u>May 2015 Emergency Regulation</u> used a sliding scale for setting conservation standards, so that communities that have already reduced their residential gallons per capita per day (R-GPCD) through past conservation had lower mandates than those that had not made such gains since the last major drought. Conservation tiers for urban water suppliers were set between eight percent and 36 percent, based on residential per capita water use for the months of July - September 2014.

During this time, statewide water conservation was <u>unprecedented</u>. In those 10 months alone, the state realized nearly a 24 percent savings in water use as compared to same months in 2013, resulting in some 1.30 million acre-feet of water conserved throughout California, enough to supply 6.5 million people with water for an entire year.

On Feb. 2, 2016, based on Governor Brown's <u>November 2015 Executive Order</u>, the State Water Board approved an updated and extended emergency regulation that continued mandatory reductions through October.

The <u>February 2016 Emergency Regulation</u> responded to calls for continuing the conservation structure that has spurred such dramatic savings, while providing greater consideration of some localized factors that influence water needs around the state: climate differences, population growth and significant investments in new local, drought-resilient water supplies such as potable wastewater reuse and desalination. The February Emergency Regulation was superseded by the Board's May 18 emergency regulation. Under the new reporting structure adopted by the Board May 18, water districts will continue to <u>report water use</u>, but had the option of identifying a new conservation standard based on any shortfall in projected supply over three drought years.

The State Water Board's May 18 emergency regulation responded in part to Governor Brown's May 9, 2016 <u>Executive Order</u> directing actions aimed at using water wisely, reducing water waste, and improving water use efficiency for the years and decades ahead. The Executive Order, in part, directed the State Water Board to extend the emergency regulations for urban water conservation through the end of January 2017. As called for in his Executive Order, it is anticipated the State Water Board will be working closely with the Department of Water Resources and other agencies to define and establish water efficiency standards for the state to ensure a more reliable water supply and to make state water users more resilient and prepared over the long-term.

March 23, 2016

Mr. Tim Godwin, Engineering Geologist Department of Water Resources P.O. Box 942836 Sacramento, CA 94236

Dear Mr. Godwin:

Temescal Valley Water District (TVWD, formerly Lee Lake Water District) is the local purveyor of potable and reclaimed water for residents in the Temescal Valley area. The District obtains imported water from the Metropolitan Water District of Southern California and also jointly manages local groundwater in its service area, coordinating with the City of Corona (Corona) and Elsinore Valley Municipal Water District (EVMWD).

I am writing in support of the basin boundary modifications proposed by Corona and EVMWD. Those modifications would create a new basin – Bedford-Coldwater Basin – by separating the hydraulicallydistinct northwestern portion of the Elsinore Basin from the remainder of that basin and modifying the boundary with the adjoining Temescal Subbasin to include all EVMWD wells. Further, modifications would modify the lateral boundaries of the new Bedford-Coldwater Basin and the revised Elsinore Basin to align more closely with the contact of alluvial deposits as recently mapped by the U.S. Geological Survey.

These modifications are consistent with current local groundwater management activities and provide a strong basis for local control as envisioned by the Sustainable Groundwater Management Act (SGMA). The TVWD service area covers most of the new Bedford-Coldwater Basin, but does not extend south into the revised Elsinore Basin. We have coordinated with Corona and EVMWD during this process and participated in the development of the proposed basin boundaries. We have published this information on our website for more than a month and have reviewed the material for the request submittal.

Thank you for allowing TVWD to comment on this basin boundary modification request. Please feel free to contact me if you have any questions.

Sincerely,

Jeff R. Pape General Manager

Temescal Valley Water District 22646 Temescal Canyon Road | Temescal Valley, CA 92883-4106 | tel: 951.277.1414 | fax: 951.277.1419 www.temescalvwd.com

B. Description of Proposed Boundary Modification

#### 1. Short Description

Partition the Elsinore Basin in two basins and align boundaries of both basins with alluvium.

2. Type of basin boundary revision

Scientific External Scientific Internal Jurisdiction Internal

3. Provide a narrative overview of the boundary modification request and how the resulting modification would affect likelihood of sustainable management.

An overview of the basin boundary modification request and advantages for sustainable management are described in the attached file. As noted in the attachment, the three primary agencies located in the affected areas are cooperating on this request including the City of Corona (Corona), Elsinore Valley Municipal Water District (EVMWD), and Temescal Valley Water District (TVWD). Corona and EVMWD are submitting this combined request, supported by TVWD. Also included in the attachment are a series of maps (Figures 1 through 7) that illustrate the current and modified basin boundaries, the service areas of the three agencies, additional agencies near the affected areas, local hydrologic features, and a long-term hydrograph for the proposed new Bedford-Coldwater Basin.

Attachment(s):

Elsinore Basin Boundary Modification Request - Section B-3.pdf (12.6MB) Uploaded on 03/31/2016 at 04:32PM

4. List the existing basin(s)/subbasin(s) to be modified by this request

8-04 ELSINORE 8-02.09 UPPER SANTA ANA VALLEY - TEMESCAL

#### 5. Provide the proposed name for the new basin(s) or subbasin(s)

Bedford-Coldwater 8-10

#### C. Initial Notification and Combination of Requests

1. Was an initial notification submitted to the Department?

```
Yes
```

List of submitted initial notification for the selected basin(s)/subbasin(s).

Local Agency	Potential Basin(s)/Subbasin(s)				
Elsinore Valley Municipal Water District	8-04 ELSINORE				
Corona City Of	8-04 ELSINORE				

2. Does this application include a combination of requests?

Yes

If yes, describe:

As stated above, two modifications are proposed to the existing Elsinore Basin (8-4). The first is to remove the Bedford-Coldwater area from the Elsinore Basin and create the new Bedford-Coldwater Basin (8-10), which also modifies slightly the southern boundary of the Temescal Subbasin (8-02.09). The second is to revise the lateral boundaries of both the new Bedford-Coldwater Basin and the Elsinore Basin to align with the contact between the alluvium and consolidated geologic units.

- **D. Required Documents for All Modifications**
- 1. A copy of the statutory or other legal authority under which the requesting agency was created with specific citations to the provisions setting forth the duties and responsibilities of the agency.

Attachment(s):

City of Corona, Legal Authority.pdf (1.2MB) Uploaded on 03/28/2016 at 10:31AM EVMWD, Rules for Organization-Articles.pdf (633.5kB) Uploaded on 03/28/2016 at 10:31AM

2. A copy of the signed resolution adopted by the requesting agency formally initiating the boundary modification request process.

Attachment(s): City of Corona, Boundary Modification Resolution, 3-2-2016.pdf (106.7kB) Uploaded on 03/28/2016 at 10:31AM EVMWD, Boundary Modification Resolution, 03-10-16.pdf (661.7kB) Uploaded on 03/28/2016 at 10:31AM

3. A map of adequate scale (no greater than 1:24,000; e.g., 1:10,000 is not acceptable) showing the proposed modified basin boundary in relation to the existing Bulletin-118 basin boundary and the local agencies that are within or bordering the existing and proposed basin.

4. A GIS shapefile of the proposed modified groundwater basin boundaries. Download Existing B118 basin shape file | DWR Spatial Data Standards

Attachment(s): BedfordColdwater and Elsinore Basin Modifications,zip (171,7kB) Uploaded on 03/28/2016 at 11:56AM

5. A GIS shapefile of the political boundaries of any affected or adjacent local agency. Download water agency shape file

Attachment(s):

Agencies\_Affected\_Elsinore\_Basin\_Modifications.zip (352.6kB) Uploaded on 03/28/2016 at 11:56AM

6. Any information, if necessary, to enable DWR to satisfy the requirements of a responsible agency pursuant to the California Environmental Quality Act.

As documented in the Staff Report for the Corona City Council meeting on March 2, 2016 (Agenda Report Item 3.G.3, page 201), the City determined ?no environmental review is required because the proposed action is exempt under the California Environmental Quality Act, or CEQA?. EVMWD agrees with this determination, as noted in the Staff Report for the EVMWD Board meeting on March 10, 2016 (Agenda Report item 1.G, page 43). Even if the action were considered a project under CEQA, the basin boundary modification would have no impact on the environment.

Attachment(s):

EVMWD, Board Meeting Agenda and Packet, 3-10-16.pdf (19.4MB) Uploaded on 03/28/2016 at 10:40AM City of Corona, Council Meeting Agenda and Packet, 3-2-16.pdf (75.5MB) Uploaded on 03/28/2016 at 10:35AM

- E. General Information
- 1. Describe the lateral boundaries of the alluvial aquifer or aquifers that form the groundwater basin and the definable bottom of the basin. The description must be in terms that are clear, definite, and sufficiently detailed to allow an authoritative map of the proposed basin boundaries to be plotted using the given description.

As described in the attached file, alluvial aquifer boundaries (including the basin bottom) of the affected groundwater basins incorporate local hydrogeologic analyses and recent geologic mapping of alluvial deposits by the U.S. Geological Survey (USGS). First, boundaries are described for the proposed new Bedford-Coldwater Basin, which consists of the northwestern portion of the current Elsinore Basin (8-4) and also slightly modified the southern boundary of the Temescal Subbasin (8-2.09). Second, the revised boundaries of the modified Elsinore Basin are described. Alluvial boundaries are illustrated by figures in the attachment that have been prepared for this request (Figures 2, 3, and 5), along with six additional key figures extracted from the Corona Groundwater Management Plan and an additional technical report.

#### Attachment(s):

Elsinore Basin Boundary Modification Request - Section E.pdf (7.2MB) Uploaded on 03/31/2016 at 04:32PM

F. Notice and Consultation

1. List all local agencies and public water systems affected by the basin(s) modification request.

The three agencies cooperating in this combined request ? Corona, EVMWD, and TVWD ? are the primary agencies affected by the proposed basin modifications. Other local agencies, public water systems, and interested parties in or adjacent to the affected groundwater basins are discussed and listed on Table 1 in the attached file.

#### Attachment(s):

Elsinore Basin Boundary Modification Request - Section F-1.pdf (3.1MB) Uploaded on 03/28/2016 at 02:06PM

2. Explain the methods used to identify interested local agencies and public water systems in the affected basin(s):

Local agencies and public water systems within the new Bedford-Coldwater Basin, modified Elsinore Basin, and adjacent Temescal Subbasin are generally known by Corona, EVMWD, and TVWD in their respective service areas. Corona and EVMWD each generated a list of agencies to notify in their respective areas or in adjacent areas as relevant. In addition, publically-available lists and shapefiles of state, federal, and private water districts and public water systems were reviewed for completeness. In Riverside County, public water systems serving fewer than 200 service connections are regulated by the County?s Department of Environmental Health (as a state-designated local primacy agency, or LPA, under the provisions of Section 116330 of the California Health and Safety Code). Any public water system in the affected basins that uses groundwater would be required to report its groundwater production (>2AFY) to the Western-San Bernardino Watermaster (compiled by Western Municipal Water District). As a result, production records were reviewed to identify potential public water systems and other interested parties in the affected basins. No new public water systems were identified in this process, but other groundwater users in each of the affected basins were added to the list as

interested parties. These parties are included in Table 1 above and were notified of the basin boundary modification request. The information provided to these parties is summarized in item F3 below.

3. Provide information regarding the nature of consultations with affected or interested agencies. Attach and cite any copies of correspondences with local agencies and public water systems and/or any other persons or entities consulted.

Consultations with affected or interested agencies were conducted via direct in-person meetings, public meetings, teleconference calls, U.S. mail, and/or email. The three agencies cooperating in this combined request consulted each other on all boundary modifications including a preliminary meeting on January 19, 2016 to discuss whether to pursue a boundary modification request. The attached file provides details on these consultations and provides sample notification letters and meeting minutes from the January meeting. Materials from two public meetings are provided as attachments to the following item, F-4.

#### Attachment(s):

Elsinore Basin Boundary Modification Request - Section F-3.pdf (7.3MB) Uploaded on 03/28/2016 at 02:09PM

4. Provide a summary of all public meetings at which the proposed boundary modification was discussed or considered by the requesting agency. Attach and cite any copies of agendas and notices published.

Both Corona and EVMWD have prepared, considered, and adopted resolutions to initiate the basin boundary modification process at public meetings. The Corona City Council adopted Resolution 2016-021 at the City Council meeting on March 2, 2016; EVMWD adopted Resolution 16-03-01at the Board of Directors meeting on March 10, 2016. Agenda and staff reports in the meeting packets provided the public with details of the basin boundary modification request; these agenda and board packets are attached for reference. For the Corona City Council Meeting, see packet item 3.G.3, page 201. For the EVMWD Board of Directors Meeting, see Board packet item 1.G, page 43. Final signed resolutions are also attached to Item D2 of this Modification Request. Temescal Valley Water District has filed a letter of support for the basin boundary modifications as provided in item H2 of this request.

#### Attachment(s):

City of Corona, Council Meeting Agenda and Packet, 3-2-16.pdf (75.5MB) Uploaded on 03/28/2016 at 11:04AM City of Corona, Boundary Modification Resolution, 3-2-2016.pdf (106.7kB) Uploaded on 03/28/2016 at 11:09AM EVMWD, Board Meeting Agenda and Packet, 3-10-16.pdf (19.4MB) Uploaded on 03/28/2016 at 11:10AM EVMWD, Boundary Modification Resolution, 03-10-16.pdf (661.7kB) Uploaded on 03/28/2016 at 11:10AM

5. Attach a copy of all comments regarding the proposed boundary modification received by the requesting agency and a summary of any responses made by the requesting agency.

To date, three letters supporting the modifications have been received. One letter was filed from the Temescal Valley Water District (TVWD) and letters of support were also filed by the Santa Margarita Watermaster and Western Municipal Water District. These letters of support for the basin boundary modifications as provided in Section H2 of this request.

#### G. General Existing Groundwater Management

All requests for jurisdictional modification pursuant to Section 342.4 MUST include responses to the following questions.

1. Explain how sustainable groundwater management exists or could likely be achieved in the basin:

The requested boundary modifications will separate the existing Elsinore basin into two basins ? the new Bedford-Coldwater Basin and the modified Elsinore Basin ? that better match both the hydrogeologic conceptual model and historical and ongoing management practices of the local groundwater resources. A description of current and future groundwater management activities relevant to the basin boundary modifications is included in the attached file. The description is supported by a series of maps prepared for this request (Figures 3, 4, 5, and 6), which are also included in the attached file.

Attachment(s):

Elsinore Basin Boundary Modification Request - Section G-1.pdf (8.7MB) Uploaded on 03/31/2016 at 04:34PM

2. Explain how the proposed boundary modification would affect the ability of adjacent groundwater basins to sustainably manage groundwater in those groundwater basins.

The new Bedford-Coldwater Basin creates or modifies the boundaries with adjoining basins - Temescal Subbasin to the north and the modified Elsinore Basin to the south. The southern boundary for the modified Elsinore Basin that adjoins the Temecula Valley Basin is unmodified. Lateral boundaries of the new Bedford-Coldwater Basin and the modified Elsinore Basin are aligned with the contact of surficial alluvial deposits and are not immediately adjacent to other basins or subbasins. The manner in which the basin boundary modification affects adjacent basins and the potential for sustainable management is described in more detail in the attached file, supported by Figure 4.

Attachment(s):

Elsinore Basin Boundary Modification Request - Section G-2.pdf (3MB) Uploaded on 03/28/2016 at 02:21PM

3. Provide a historical summary of the sustainable management of groundwater levels in the proposed basin(s) or subbasin(s).

In the new Bedford-Coldwater Basin, water levels are actively managed through a 2008 agreement that limits groundwater extraction in the area where most of the pumping occurs and encourages projects that enhance recharge. Further, the three agencies sponsoring this request represent more than 90 percent of the total recent groundwater pumping in the new Bedford-Coldwater Basin. In the modified Elsinore Basin, EVMWD has developed direct recharge projects to manage groundwater levels locally throughout the modified basin. The two Groundwater management plans

that cover the affected basins were prepared by the three agencies sponsoring the request. This local control allows the agencies to coordinate management of groundwater levels while meeting beneficial use in each basin. Details of historical management of water levels in the affected basins are provided in the attached file, which also includes nine pertinent figures that illustrate and support the summary.

#### Attachment(s):

Elsinore Basin Boundary Modification Request - Section G-3.pdf (6.5MB) Uploaded on 03/28/2016 at 02:20PM

4. Discuss potential impacts to state programs resulting from the proposed boundary modification, including, but not limited to, the California Statewide Groundwater Elevation Monitoring (CASGEM), Groundwater Management Plans developed pursuant to AB 3030, Groundwater Sustainability Plans developed pursuant to the Sustainable Groundwater Management Act, any applicable state or regional board plans, and other water management and land use programs.

The creation of the new Bedford-Coldwater Basin will not adversely impact state programs. The same standards of CASGEM compliance will be maintained in the new Bedford-Coldwater Basin and the modified Elsinore Basin. EVMWD is the current Monitoring Entity for the CASGEM program and will continue the on-going monitoring efforts after the new basin boundary modifications. In addition, the two Groundwater Management Plans covering the new Bedford-Coldwater Basin and the revised Elsinore Basin do not overlap and will not be affected by the boundary modifications. As previously described, Corona?s 2008 GWMP includes the proposed new Bedford-Coldwater Basin; EVMWD?s 2005 GWMP includes portions of the remaining Elsinore Basin but does not include the proposed new Bedford-Coldwater Basin. There are no conflicts between the two plans and the proposed boundary revisions. None of the groundwater management activities being developed from the plan are in the areas being modified. The legal agreement between EVMWD and Corona regarding managed extractions from the Coldwater area (see response to G3 above) will continue and is not affected by any of the boundary modifications. Current land use and future land use decisions will not be impacted by the basin boundary revisions. The City of Corona, a sponsor of these revisions, has local land use authority along with the County of Riverside. As mentioned in Section F, the County of Riverside Land Use Planning Department has been notified of these revisions ? none of which are expected to impact the County?s land use activities. As described in G1 above, the basin boundary modifications will represent more continuous and technically-justifiable groundwater basins than current boundaries allow.

#### H. Local Support

All requests for boundary modification must include the following:

1. Provide any evidence that sufficient information was provided to affected agencies and systems regarding the proposed boundary modification.

Detailed information, including a map with all of the basin boundary revisions, has been published continuously on the Corona and EVMWD websites for more than a month. Notification letters have been provided to agencies with systems in the affected basins, even those located a considerable distance away from any boundary modifications. Sample notification letters are attached to item F. These letters were mailed or both mailed and emailed to all parties on the distribution list, reproduced as Table 1 in item F1; letters to all parties were identical to the sample letters. Two public meetings have been held, one by Corona and one by EVMWD, to provide detailed information to local agencies and the public. In addition, the three agencies cooperating on this request are also the agencies most affected by the proposed boundary modifications. The boundaries were specifically delineated by these agencies to facilitate their own upcoming sustainable management activities under SGMA. Therefore, the agencies most affected by this request have been involved in the process from the beginning.

2. Provide a list of all affected agencies and affected systems that submitted comments and/or documents in support or opposition to the proposed boundary. The agency submitting their support or opposition for a boundary modification must provide a copy of a resolution formally adopted by the decision-making body of the affected agency or system or a letter signed by an executive officer or other official with appropriate delegated authority who represents the agency or system. Attach copies of the resolution and/or signed letter detailing the support or opposition submitted.

Two comment letters have been received to date. One is from the Santa Margarita River Watermaster (letter attached). In that letter, the Watermaster supports the proposed basin boundary modifications. The letter also correctly notes that no boundaries of the Temecula Valley Groundwater Basin are being modified. Further, the letter states that the basin boundary modification request does not alter the findings by the Watermaster related to watershed boundaries for the purposes of reporting by EVMWD. The second comment letter is from Western Municipal Water District, expressing support and recognizing the benefits to sustainable groundwater management from the modifications. Both Corona and EVMWD submitted Initial Notifications and represent the requesting agencies. TVWD has also been involved throughout the process, attended meetings and conference calls on the basin boundary modifications (see item G), and also published the information on its website. To confirm its support for this boundary modification request, TVWD has submitted a letter of support, attached to this item.

#### Attachment(s):

Letter of Support from TVWD for Elsinore Basin Boundary Modifications.pdf (250.4kB) Uploaded on 03/28/2016 at 09:56AM Letter of Support from Santa Margarita Watermaster for Elsinore Basin Boundary Modifications.pdf (119.5kB) Uploaded on 03/28/2016 at 01:27PM Letter of Support from Western Municipal Water District for Elsinore Boundary Modifications.pdf (49.3kB) Uploaded on 03/28/2016 at 04:13PM

3. Provide any evidence that rebuts any opposition to the proposed boundary modification.

No opposition to the proposed boundary modifications has been received to date.

Requests for boundary modification, must include a document or text to a clearly defined hydrogeologic conceptual model demonstrating each of the following:

I. Hydrogeologic Conceptual Model

1. Principal aquifer units within requested basin.

2. Lateral boundaries of the proposed basin, including:

- A. Geologic features that significantly impede or impact groundwater flow.
- B. Aquifer characteristics that significantly impede or impact groundwater flow.
- C. Significant geologic and hydrologic features and conditions of the principle aquifer units, as appropriate, including information regarding the confined or unconfined nature of the aquifer, facies changes, truncation of units, the presence of faults or folds that impede groundwater flow, or other groundwater flow restricting features.
- D. Key surface water bodies, groundwater divides and significant recharge sources.
- 3. Recharge and discharge areas within the basin.
- 4. Definable bottom of the basin or subbasin.

The department may waive this requirement for an internal boundary modification if the requesting agency is able to demonstrate that the proposed boundary modification is unlikely to affect sustainable groundwater management.

Descriptions of the hydrogeologic conceptual models for the affected basins are provided in the attached file. Separate files have been provided presenting the conceptual models for the proposed new Bedford-Coldwater Basin and .the modified Elsinore Basin. The conceptual model descriptions in the attached files are supported by a series of maps and figures, which follow the text in each of the files. Relevant studies relied upon to support these descriptions are attached to this request in Sections J and L. Because the new Bedford-Coldwater Basin also modifies slightly the southern adjoining boundary with the Temescal Subbasin, relevant information on the conceptual model for the Temescal Subbasin is also included in the new Bedford-Coldwater conceptual model for completeness. However, the description of the Temescal Subbasin contains less detail because the modifications are minor and do not affect primary areas of recharge or discharge. A full conceptual model of the Temescal Subbasin is provided in the Corona GWMP, attached in Section J.

#### J. Technical Studies for External Scientific Modifications

Requests for a scientific modification must include a document containing information that demonstrates the extent of the aquifer. Provide the following:

1. A qualified map that depicts the lateral boundaries of the aquifers that define the basin or subbasin.

The extent of the alluvium and the consolidated bedrock as mapped by the USGS is shown on Figures 3 and 4, attached.

Attachment(s):

2. A technical study that provides subsurface data that demonstrates the vertical thickness and relevant physical properties of the alluvial aquifer or stacked series of alluvial aquifers.

Technical studies providing subsurface data about the alluvial aquifer within the new Bedford-Coldwater Basin and the Elsinore Basin are summarized below and attached. If available, a URL is also provided. New Bedford-Coldwater Basin Todd Engineers and AKM Consulting Engineers (Todd and AKM), 2008. AB3030 Groundwater Management Plan, prepared for City of Corona. K. Technical Studies for Internal Scientific Modifications

Requests for an internal scientific modification involving a hydrogeologic barrier must include a document or text that demonstrates the presence or absence of subsurface restrictions on lateral groundwater flow. Provide the following:

1. A qualified map depicting structural geologic features that could significant impact or impede lateral groundwater flow.

The boundary between the new Bedford-Coldwater Basin and the Elsinore Basin is an area of very thin alluvial sediments, as indicated in the cross section on Figure 3-3d of WEI, 2015, which is attached.

Attachment(s):

Figure 3 - Alluvial vs Bedrock and Basin Boundaris.pdf (814.7kB) Uploaded on 03/31/2016 at 04:35PM

WEI 2015 Figure 3-2.pdf (1MB) Uploaded on 03/28/2016 at 12:04PM

Figure 2 - Geology abd Basin Boundaris.pdf (1.7MB) Uploaded on 03/28/2016 at 12:03PM

WEI 2015 Figure 3-3d.pdf (187.8kB) Uploaded on 03/28/2016 at 12:04PM

2. Geologic and hydrologic evidence of groundwater conditions by attaching or providing a URL to any of the following:

- A. Historical and current potentiometric surface maps, groundwater levels, groundwater recharge and discharge areas of the aquifer system within the vicinity of the proposed boundary modification.
- B. Aquifer performance testing results demonstrating basin boundary condition response.
- C. Water quality information of the aquifer system including but not limited to general water quality parameters and isotopic analysis.
- D. Supporting certified geophysical studies.
- E. Any other pertinent information.

The southern boundary of the new Bedford-Coldwater Basin represents an internal boundary supported by technical studies, geologic mapping, and hydrogeologic principals. The boundary is not considered an absolute hydrogeologic barrier to groundwater flow, but evidence supports very little to no groundwater inflow across the new boundary. This evidence is described in the attached file.

#### L. Technical Studies for All Jurisdictional Modifications

Requests for a jurisdictional boundary must attach or provide a URL or upload a file for the following:

- 1. A water management plan that covers or is in the immediate vicinity of the proposed basin or portion of the proposed basin and satisfies the requirement of Water Code sections 10753.7(a) or 10727 by attaching one of the following:
  - A. An adopted groundwater management plan, a basin wide management plan, or other integrated regional water management program or plan.
  - B. Management pursuant to an adjudication action.
  - C. One or more technical studies that cover the relevant portion of a basin or subbasin and adjacent areas.

2. A statement of the existing and planned coordination of sustainable groundwater management activities and responsibilities where required.

Corona, EVMWD, and TVWD will coordinate to form a Groundwater Sustainability Agency (GSA) for the new Bedford-Coldwater Basin. This purpose of this GSA will be to comply with SGMA and to prepare and implement a Groundwater Sustainability Plan (GSP) for the new Bedford-Coldwater Basin. EVMWD will form a GSA for the Elsinore Basin with the express purpose of complying with SGMA to prepare and implement a GSP.

Board of Directors Temescal Valley Water District

Re: Water and Sewer Operations - July 2016

Dear Board Members:

Temescal Valley Water District operations personnel perform the following tasks on a regular and routine basis:

- Managed <u>293.46</u> acre-feet of water through system.
- Collected monthly potable water samples. We are now collecting four samples per week as required by the State Water Resources Control Board, Division of Drinking Water.
- Submitted monthly report to the Regional Water Quality Control Board for:
  - Temescal Valley Wastewater Reclamation Facility
- Submitted monthly report to the State Water Resources Control Board, Division of Drinking Water for TVWD distribution system monitoring.
- Read <u>5156</u> water meters.
- Maintained aesthetic appearance of all District facilities.
- <u>25</u> shut-offs.
- Responded 141 service calls.
- Installed <u>6</u> meters for the various developers
- Responded to <u>39</u> USA Dig Alerts to mark District underground utilities.

Water & Sewer Operations Page 2

In addition to the above regular and routine tasks we also performed the following operational tasks.

- Well # 4 column extension of 15' has been added. Well # 4 pump and motor failed and have been removed for repair/replacement.
- Drying and removing biosolids at a rapid rate due to high heat of summer.
- Overflow storage basin (north end of TVWRF) is completely empty. Awaiting design of modifications.
- Submitted July report to the State Water Resources Control Board via CWIQS.

Sincerely,

Kenneth R. Caldwell, Operations Superintendent

## TEMESCAL VALLEY WATER DISTRICT ENGINEERING DEPARTMENT

# DISTRICT ENGINEER'S MONTHLY REPORT

**Date**: August 17, 2016

To: Jeff Pape, General Manager

From: Neil A. Harper, District Engineer

Subject: Engineering Activities Update for the Month of July 2016

Following is a summary of the status of current engineering projects:

## PLAN CHECKING & DEVELOPER RELATED PROJECTS

Terramor Water, Sewer, & RW Improvements In-Tract Backbone (8432) – No engineering activity this month.

Terramor Water, Sewer, & RW Improvements In-Tract Laterals (8773) – No engineering activity this month.

*Terramor Regional Sewer LS* (8957) – No engineering activity this month.

Forest Boundary Tract 35249 (9351) – No engineering activity this month.

*TVWD Water Reclamation Facility Expansion* (9830) – Commence plan check with review of PDR and 30% plans.

## **CAPITAL IMPROVEMENT PROJECTS**

None Currently.

## AS-NEEDED ENGINEERING SERVICES

## General Engineering Initiated During FY 2015/16 (1401-15XX)

- Phase 1503: Wastewater Related Services for FY 2015/16. Prepare District Engineer's report and attend monthly board meeting.
- Phase 1504: Potable Water Related Services for FY 2015/16. No engineering activity this month.
- Phase 1505: Non-Potable Water Related Services for FY 2015/16. No engineering activity this month.
- Phase 1506: Wastewater Mapping Updates for FY 2015/16. No engineering activity this month.
- Phase 1507: Potable Water Mapping Updates for FY 2015/16. No engineering activity this month.
